WORK EXPERIENCE

Altrum AI (Aligne Consultancy Pvt. Ltd.)
Full Stack Engineer

Remote, London
Jan 2025–July 2025

Core Product Development

- Developed a scalable Next.js SaaS platform for AI proxy/gateway services supporting OpenAI, Anthropic, Gemini, Bedrock, and Azure.
- Designed multi-tenant PostgreSQL schema with Prisma, supporting RBAC and policy versioning.
- Built a unified API gateway with parameter mapping, cost tracking, and transformation utilities.

Infrastructure & DevOps

- Created CI/CD pipelines using GitHub Actions for automated deployment to AWS Elastic Beanstalk.
- Dockerized the application with multi-stage builds and optimized production setup.
- Integrated AWS services like S3, SES, and Secrets Manager for storage, email, and secure config.

Security & Monitoring

- Built advanced logging with PII redaction, securing sensitive user and auth data
- Created a Chrome extension to track LLM prompt/response usage for compliance and analytics.
- Implemented guardrails including toxicity filtering, prompt injection detection, and data privacy.

API Integration & Documentation

- Integrated and standardized APIs for multiple LLM providers under a single interface.
- Developed reusable middleware for caching, logging (CloudWatch), and request auth.
- Authored extensive API documentation and onboarding guides for developers.

Frontend Architecture

- Built a responsive dashboard UI for project setup, policy configuration, and real-time analytics.
- Implemented protected routing and state management using React Context Providers.
- Created reusable UI components using Tailwind CSS and the shadcn/ui library.

Tata Consultancy Services
Frontend Developer

Pune, Maharashtra
July 2021–Nov 2024

Banking & Insurance Applications

- Developed responsive and accessible UI components using ReactJS, Bootstrap, and Tailwind CSS for enterprise-grade portals.
- Built and consumed RESTful APIs using Node.js and Express.js to support real-time user actions like transactions and claims.
- Implemented user login, session management, and authentication mechanisms backed by MongoDB.
- Enhanced form handling with real-time validation, error display, and accessibility improvements.
- Improved state management using Redux and Context API, leading to better scalability across modules.

Performance & Code Quality

- Refactored legacy codebases to improve maintainability, modularity, and adherence to React best practices.
- Introduced React hooks and reusable components to reduce duplication and improve testability.
- Performed regular code reviews and implemented ESLint, Prettier, and Git hooks for consistent code quality.

Team Collaboration & CI/CD

- Collaborated with cross-functional teams in agile sprints to deliver UI enhancements and bug fixes.
- Used Git, GitHub, and JIRA for version control and task tracking.
- Supported CI/CD pipeline setup and testing integration using Bamboo and Postman for API validation.

PROJECTS

FileNest - Document Upload Application

Tech Stack: ReactJS, Firebase Authentication, Firebase Storage, HTML5/CSS3, JavaScript

- Built a Google Drive-like app with Firebase for real-time file uploads and secure access.
- Integrated Firebase Authentication for login and session management.

LiveLogistics - Real-Time Food Delivery Tracking System

Tech Stack: Apache Kafka, Node.js, JavaScript, Git, GitHub

- Developed Kafka producers/consumers to stream live updates of delivery rider locations.
- Built backend logic for processing and displaying order-tracking information in real-time.

KEY SKILLS

Frontend Development: React.js, Next.js, Tailwind CSS, shadcn/ui, Redux, Context API, HTML5, CSS3, JavaScript, Responsive Design, Figma.

Backend & API: Node.js, Express.js, REST APIs, Prisma ORM, PostgreSQL, MongoDB, Firebase, JWT, Apache Kafka

Cloud & DevOps: Docker, GitHub Actions, AWS (Elastic Beanstalk, S3, SES, Secrets Manager), CI/CD, CloudWatch

Security & Testing: RBAC, PII Redaction, Prompt Injection Defense, Secretlint, Hadolint, ESLint, Jest, Mocha, Chai, Postman

Tools: Git, GitHub, Webpack, Babel, NPM, Prettier, Chrome Extensions

EDUCATION

Bachelor of Technology in Computer Science & Engineering
Punjabi University Patiala

August 2017 – August 2021
CGPA: 8.02
